

## ORANGE IRRIGATION DAM

Fabrimetrics' traditional premium quality irrigation dam material uses only 100% virgin resins in both the high-density yarn and the low-density coating with maximum color pigmentation and UV inhibitors. Our factories use a wider loom, so the dams are made without a heat seal through the 9' depth. The orange material features a 6" loop (or sleeve), sewn with 100% polyester thread using a double-needle chain stitch with 4 to 5 stitches per inch.

10x10 Weave – 1000 Denier Yarn – 8.5 to 9 mil Thick  
 250 Grams per Lineal Meter  
 4.9 oz. per Square Meter / 4.1 oz. per Square Yard  
 Tensile Strength: 160# x 160#
