

## GREEN IRRIGATION DAM

Fabrimetrics' traditional premium quality irrigation dam material uses only 100% virgin resins in both the high-density yarn and the low-density coating with maximum color pigmentation and UV inhibitors. Our factories use a wider loom, so the dams are made without a heat seal through the 9' depth. The green material features a 6" loop (or sleeve), sewn with 100% polyester thread using a double-needle chain stitch with 4 to 5 stitches per inch.

10x10 Weave – 1000 Denier Yarn – 8.5 to 9 mil Thick

250 Grams per Lineal Meter

4.9 oz. per Square Meter / 4.1 oz. per Square Yard

Tensile Strength: 160# x 160#

Size (Depth x Width)	Pieces per Carton	Weight per Carton	Part Number	UPC Code
6' x 100'	2	36	12256	0-90986-12256-8
7' x 100'	2	42	12257	0-90986-12257-5
