

BLUE IRRIGATION DAM

Fabrimetrics' traditional premium quality irrigation dam material uses only 100% virgin resins in both the high-density yarn and the low-density coating with maximum color pigmentation and UV inhibitors. Our factories use a wider loom, so the dams are made without a heat seal through the 9' depth. The blue material features a 6" loop (or sleeve), sewn with 100% polyester thread using a double-needle chain stitch with 4 to 5 stitches per inch.

14x14 Weave – 1000 Denier Yarn – 11.5 to 12 mil Thick

390 Grams per Lineal Meter

7.57 oz. per Square Meter / 6.27 oz. per Square Yard

Tensile Strength: 260# x 260#
